***Abstract.** The subject of this paper is virtual collaboration project between students from Faculty of Organization and Informatics and students from Amsterdam School of International Business. In the project were also included students on Erasmus+ program. With the help of ICT, students overcame all the spatial and temporal barriers which were imposed on them.*

Also, a survey was conducted regarding Intercultural communication and Hofstede's cultural dimensions on the sample of students from Croatia, France, the Netherlands and USA, with which we were communicating this summer semester. The given results were compared with the results of the general population for each country.

Keywords. virtual collaboration, intercultural communication, Hofstede's cultural dimensions, spatial barriers, language barriers
